All matters of this documentation is classified as top security clearance information on level 904/A. The information stored on these silicon crystal/type 103/data storage units are for use with the onboard M-12 Navigational and Planetary Trajectory System. These disks contain classified information on all Federation known star and planetary bodies as well as all known adversaries' starship technology and design structures. These disks can be used as well with all starship based tactical and weapons Uniscan computer display systems. These disks are issued by Starfleet command to Admiral Jason Reskin of the U.S.S Enterprise/NCC-1701-A. All rights to this property are reserved for Starfleet Command and Admiral Reskin. If usage of this equipment is desired by any commanding officer of the Federation starships please contact your nearest starbase for proper application forms.

For the Interface of this Information

to Federation M-12 Data Banks
