Security accessed. Code: 2435-A.

To: Captain Reskin of the Federation Starship Enterprise N.C.C. 1701-A.

A priority eight situation has been activated to all Federation vessels within this comm link's range. Two months, twelve days, and five hours ago on stardate 2811.6 Starfleet Command lost contact with the U.S.S. Daystrom N.C.C. 20014, and the U.S.S. Royal Sovereign N.C.C. 1642. A fleet of five ships was sent to investigate but no traces of either vessel has been discovered. Presently a Light Klingon Cruiser has disappeared in the same sector. The Enterprise as well as five other Federation vessels (the U.S.S. Argana, the U.S.S. Ambergris, the U.S.S. Excelsior, and U.S.S. Polaris) are to report to the sector where contact was lost. PROCEED WITH CAUTION. Under no circumstances are you to proceed without proper authorization from Starfleet Command or a senior officer ranking Admiral and above. During your flight you will receive further operational orders and tactical maps. We will also issue navigational and defensive charts for use in the situations that may follow.

Multicom link now activated

"This Admiral Wellington of the Ambergris. I just want to suggest that

you might want to check your shielding. There's a massive solar wind storm in that area, lighting, sparks, the whole bit. We might have a crisis on our hands. Wellington out."
